Good Health and Wellbeing

Taekwondo Master

At OMEGA Solutions we prioritise and promote good health and wellbeing. Our Technical Manager Chris Griffiths CEng has recently taken over one of the three Gloucester Taekwondo schools! Everyone who knows Chris

appreciates the significant effort he puts into OMEGA and his professional career, and outside of work, he is no different! With over 70 students, Chris is using his extensive martial arts experience to not only maintain a healthy and balanced lifestyle, but he is also encouraging the next generation to do the same!

Marathon for Heros

In November our Operations Director, James Bailey, completed the New York Marathon. James reports that the first 14 miles were exceptional, but then the pain and soreness set in! Nevertheless, he persevered and made us all proud. He would like to thank those who sponsored him, helping him raise a total of £1,330

for the Royal British Legion (exceeding his original target of £1,000). Your kind support made a big difference to the legion and the valuable work that they do.

Employee Development

SMSTS Training

At Omega we are always uplifting our employees to grow and learn. We are delighted to announce that Lizz and Luke went on and SMSTS training course to become certified site managers. With their hard work they both passed with flying colours. They are now qualified to manage a site opening new opportunities for them and the company.

Site Safety Plus

To certify that

Luke Meier

has successfully completed the following course

Site Management Safety Training Scheme

For the Construction and Civil Engineering Industries

Site Management Safety Training Scheme

For the Construction and Civil Engineering Industries

STEMazing

Being in the center of Cross Hills Omega prides itself on being integrated in the local community. This year Clair Kuraz delivered four amazing STEM lessons at local schools. She connected with the children and helped inspire them to become the next generation of engineers.

Awards

RAC cooling awards

At this year's RAC cooling awards Omega was nominated for 3 awards, winning 2 of them! Now Data was recognised as the product of the year, an amazing sign that we are building something revolutionary. Also recognised was our Technical Director Nabil Cook for his immense contribution to furthering innovation in the industry and being a reliable opinion for honest advice.

Keighley & Airedale Business Awards

Fresh off winning the Product of the Year and the Gold Award at the RAC Cooling Awards, we were delighted to also be awarded the Professional Services Business at the Keighley & Airedale Business Awards! Topping off a fabulous time at Victoria Hall, Keighley, we are thrilled to announce that we also won the major award of the evening; Overall Business of the Year 2025. A massive, but very welcome surprise! This is a testament to the effort, enthusiasm and commitment of all our team, and not forgetting all our customers who support our business.

Charity

Sponsorships

This year, Omega Solutions was very proud to sponsor Yorkshire Rugby. 

Teamwork, fitness, health, and a strong sense of belonging are all traits Omega aspires to, all things which sport teaches us in abundance.

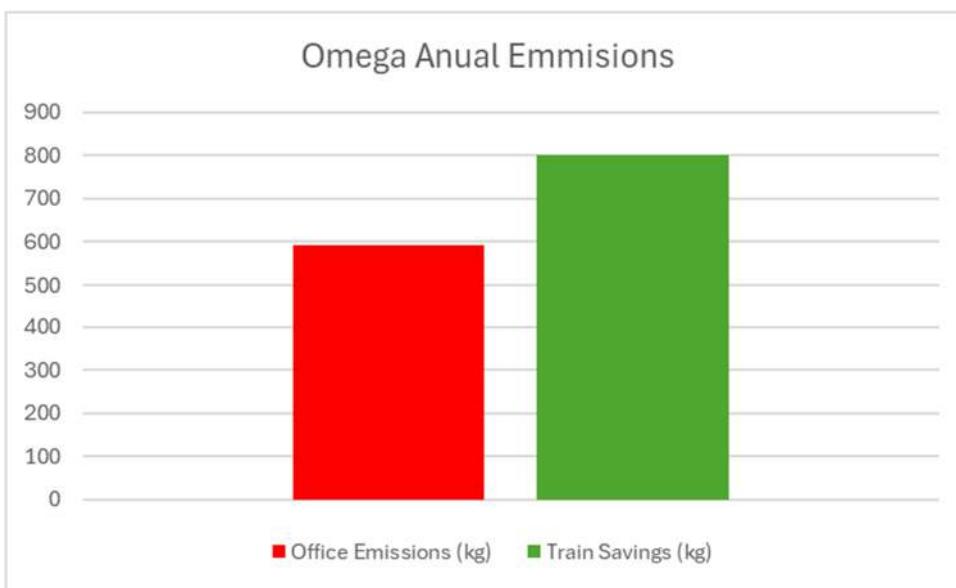

Go Yorkshire, and may the best teams win!

Energy and Emissions

Energy

At Omega our small office is the extent of our emissions through energy usage. With an average of 50Kg of Co2 a month our office annually releases 600Kg of Co2. This value seems high but when factoring in emissions saved from train journeys that could have been driven (80% less emissions) we can offset our office energy usage.

Emissions

Our primary output of Co2 is due to car emissions, this year we drove almost 45,000 miles to visit various sites up and down the country. This resulted in almost a tonne of Co2 being released into the atmosphere. While our business is focused on helping retailers reduce emissions, we would like to offset our own emissions. Make It Wild is a company that for a fee will plant trees to offset carbon emissions, this costs just £140 for 10 tonnes of carbon offsets. These trees will be used to preserve nature reserves in the UK and once planted we will be given the location and will be able to visit our own trees.

Future

As we move into the new year Omega Solutions will continue to provide consultation to a variety of retailers across the country and will begin working with new clients. We are also looking forward to the rollout of NowData and Micro Pipe, expanding the business beyond consultation.
